TECHNOLOGY DEPARTMENT

Index to Volume Forty
The PAPER INDUSTRY

April 1958—March 1959

Page numbers in this index are preceded by numbers of the issues.
April 1958 is No. 1, and March 1959 is No. 12

This index is in two parts—subject and author

PUBLIC LIBRARY
APR 20 1959
DETROIT

Subjects . . .

A

Abitibi Corp.
Abitibi's log- and chip-handling system, Robert E. Place 6, 362

Accounting
Cost accounting for paper mills, Edward W. Rodgers, Part I—Standard cost methods to achieve cost control 8, 518; Part II—Installation of a standard cost system 9, 596; Part III—Why standard cost systems fail and what may be expected from them 11, 738

Adhesives
A glamor status for adhesives (an editorial) 8, 505; Animal-based adhesives 11, 730; Animal blood and casein adhesives 12, 808; Bark made into weatherproof adhesive (Whither? item) 5, 342; Casein and animal blood adhesives 12, 808; Classification of adhesives 10, 673; Economics and technical achievements of adhesives 8, 515; Theory of adhesion 9, 593

Air Pollution
American Society of Mechanical Engineers to study air pollution 12, 832

Air Supply
Instrument air supply for pneumatic process control, Leo Walter 11, 734

Alaska Pine & Cellulose Ltd.
Completes $14,000,000 modernization program 4, 241

Alaska Pulp Co.
Japanese pulp mill to be built near Sitka, Alaska (Whither? item) 12, 688

American Box Board Co.
Sulfate pulp mill at Filer City, A. W. J. Dyck 4, 224

American Chemical Society
Important symposia at the 133rd meeting of the American Chemical Society, Louis E. Wise 3, 165

American Paper and Pulp Association
82nd annual APPA meeting 12, 819

American Pulp & Paper Mill Superintendents Association
Cost reduction—theme of 39th annual convention 4, 235

B

Babcock & Wilcox Co.
Develops pressurized-furnace steam generator (Whither? item) 12, 866

Bagasse
Cleaning and depithing bagasse for papermaking 5, 296; Kraft pulping process for bagasse 12, 848; Production of pith-free paper pulp from bagasse 10, 694; Quality boxboard from bagasse (Whither? item) 3, 212

Bags
Uses of multiwall shipping bags (Whither? item) 6, 414

Barking
Experiences with modern Swedish barkers 2, 122

Black-Clawson Co.
Adopts use of fiber containers for packaging jordan filling (Whither? item) 4, 272

Bleaching
Alkaline peroxide solutions used in a bleaching system (Whither? item) 7, 500; Bleaching groundwood pulp 8, 549; Bleaching of wood pulp with chlorine dioxide 5, 320; Pitch deposits formed in bleaching sulfite pulps 4, 251; Pulp bleaching problems 12, 842

Boise Cascade Corp.
Vibroflotation method used for effective soil compaction on sandy industrial site at paper mill at Wallula, Wash. (Whither? item) 1, 72

Bolton Award
Announcement of winners of the 11th contest 5, 311; Portrait of 11th Bolton award winner 7, 469

Bolton & Sons Inc., John W.
Establishes Pulp & Paper Research Center in Lawrence, Mass. 3, 181

Bowaters Carolina Corp.
Builds world's largest pulp-drying plant 9, 616

Bowater's Newfoundland Pulp & Paper Mills Ltd.
Experiments with newsprint 12, 831

British Columbia Forest Products Ltd.
Builds multimillion-dollar pulp mill in British Columbia 1, 44

Buckeye Cellulose Corp.
Sets highest pulp and paper safety record 11, 766; Sponsors research at Swedish school 8, 535

C

Calendering
Eastman Kodak's new supercalender, A. W. J. Dyck 7, 446; Supercalender at Eastman Kodak's film department, A. W. J. Dyck 7, 446; Supercalender drive at Eastman Kodak introduces new system, Charles D. Beck 8, 522

Canada Paper Co.
Announces the manufacture of Clupak 11, 754

Canadian Pulp and Paper Association
45th annual meeting of the technical section of CPPA 11, 743

Catalysts
Pine gum derivatives used as catalysts (Whither? item) 1, 72

Celanese Corp. of America
Develops new water-thinned aluminum coating for paper (Whither? item) 5, 342

Cellulose
Adsorption of lignin and hemicellulose on cellulose 10, 710; Alkaline treatments of cellulose 8, 553; Cellulose degradation by ultraviolet light 7, 451; Degradation of cellulose in alkaline cooks 3, 192; Detection of carboxymethyl cellulose in rosin size and paper 4, 251; Fractional precipitation of cellulose nitrates 10, 708; Molecular weights of native celluloses 4, 252

Champion Paper & Fibre Co.
No. 12 machine renovated at Champion's Carolina Div. 7, 465

Chase Bag Co.
Enters 101st year 7, 461

Chemicals
Advantages of chemical felt conditioning (Whither? item) 11, 792; Adsorption of lignin and hemicellulose on cellulose 10, 710; Alkaline treatments of cellulose 8, 553; Application of pipe, fittings, valves and pumps in chemical recover and cooking liquor preparation, Roland L. Allen Jr. 9, 598; Aqueous solution for fireproofing paper 10, 693; Bleaching of wood pulp with Chlorine dioxide 5, 320; Boiler scale removal with ethylenediamine tetra-acetic acid (EDTA) 5, 324; Cellulose nitrate and butylamine from cotton linters 6, 397; Chemical and heat recovery

from black liquor 8, 550; Cross-linked dicarboxyl starch as a new derivative (Whither? item) 7, 500; Delignification of wood and semichemical pulps with nitric acid 11, 776; Detection of carboxymethyl cellulose in rosin size and paper 4, 251; Dimethyl sulfoxide from kraft pulping 5, 323; Ether extracts of birch sulfite pulps 5, 323; Fillers used in paper and board 8, 554; Fractional precipitation of cellulose nitrates 10, 708; Lignin recovery from black liquors 7, 480; Making dimethyl sulfide from pulp mill spent liquors 6, 394; Modified mechano-chemical pulping 9, 626; Molecular weights of native celluloses 4, 252; New chemical recover unit in operation at Chesapeake Corp. 4, 241; New styrene butadiene latex for paper coatings (Whither? item) 3, 212; Nitrogen-containing lignins that are useful as fertilizers 12, 846; Oxidation of sodium sulfide in black liquors 5, 324; Paper from pulp oxidized with periodic acid 7, 477; Pigment for use in paper manufacture 5, 318; Production of sulphite acid 12, 847; Recovery of chemicals from smelt solutions 10, 692; Recovery of chemicals in wood pulp preparation 6, 392; Separation of lignosulfonic acids 10, 693; Separation of methanol lignin 6, 397; Studies on mercury as a health hazard in groundwood and paper mills 10, 710; Swedish turpentine; terpene hydrocarbons from sulfate turpentine 5, 397; Tall oil rosin goes overseas 6, 375; Videne, a new polyester laminating film (Whither? item) 4, 272

Chips and Chip Handling
Chip- and log-handling at Abitibi's Alpena mill, Robert E. Place 6, 362; Cypak control for wood chip chemical digester systems, Wesley A. Roth 6, 366; Chip moisture in kraft pulping (Whither? item) 7, 500; Flow-eveners for wood chip digesters 6, 392; Is the pulpwood industry going to chips? (Whither? item) 1, 72; New method of sawing produces larger chips 12, 832

Clupak Inc.
Owns patent on Clupak paper (Whither? item) 2, 142

Coating
Apparatus for coating paper 12, 848; Reverse roll coating machine 10, 693; Roll-coated and trailing-blade-coated paper in one operation (Whither? item) 9, 646

Continental Can Co.
Opens research laboratory 7, 463

Corrugating
Sonoco Products' new corrugating board facilities, A. W. J. Dyck 9, 584

Cotton
Chemically-modified cotton linters in rag-content paper (Whither? item) 9, 646; Cellulose nitrate and butylamine from cotton linters 6, 397

Crown Zellerbach Corp.
Has developed fertilizer pellets for forest seedlings (Whither? item) 8, 572

Current Comments
1, 35; 2, 103; 3, 173; 4, 239; 5, 303; 6, 371; 7, 455; 8, 533; 9, 605; 10, 681; 11, 749; 12, 825

D

D. & S. Engineering Ltd.
Develops new method of flash drying pulp (Whither? item) 7, 500

Depithing
Depithing and cleaning of bagasse for papermaking 5, 296

Digesters and Digesting
Apparatus for the digestion of wood fibers for the production of pulp 10, 693; Chip control system for chemical digesters, Wesley A. Roth 6, 366; Continuous digester at Sonoco Products, A. W. J. Dyck 9, 584; Degradation of cellulose in alkaline cooks 3, 192; Digestion apparatus 6, 393; Digestion of wood by the sulfite method 12, 847; Flow-eveners for wood chip digesters 6, 392; Penetration in the sulfite digestion 12, 843; Process for continuous digestion of wood straw, etc. 7, 482; Trend to continuous digestion in the manufacture of high-quality pulps (and editorial) 5, 277

Drives
Electric helper drives for fourdrinier machines, E. J. Campbell 6, 356; Supercalender drive at Eastman Kodak introduces new system, Charles D. Beck 8, 522

Drying
Apparatus for drying webs of pulp 7, 480; Conveyor system for pulp dryers 4, 254; Drying of paper on felt-covered cylinders 11, 775; Effects of drying wood and pulp on pulp quality 7, 478; Method of conveying wet pulp webs before entering a dryer 10, 771; Skin drying effects caused by hot air drying of paper and paperboard 5, 323

E

Eastern Corp.
Sulfate pulp mill at Lincoln, Maine, R. M. Ludwig 5, 286

Eastman Kodak Co.
Supercalender at Eastman Kodak's film department, A. W. J. Dyck 7, 446; Supercalender drive introduces new system, Charles D. Beck 8, 522

Editorials
(Brief items of interest) The role of pipe, fittings, valves and pumps in the pulp and paper industry 1, 5; Plan new, large-scale expansions now 2, 77; Chemical research aids new and improved product development 3, 147; Why cost control? 4, 217; Trend to continuous digestion in the manufacture of high-quality pulps 5, 277; What do our readers want? 6, 347; Genetics shows the way to improved pulpwood production 7, 419; A glamor status for adhesives 8, 505; Paper barometer predicts continued improvement in business activity 9, 577; Will the Magnefite process cause a return-swing to sulfite pulping? 10, 651; How 4o prolong fourdrinier wire life 11, 719; A need for more intensive research 12, 797

E. I. du Pont de Nemours & Co. Inc.
Develops Plastic printing plates (Whither? item) 10, 712

F

Falls Paper & Power Co.
Wins Fritz Memorial Trophy for safety 8, 512

Felt
Advantages of chemical felt conditioning (Whither? item) 11, 792; Dryer felt arrangement 5, 319; Drying of paper on felt-covered cylinders 11, 775; Method of making a papermaker's felt 4, 255; Use of electrical energy in heating the felt and web has improved drainage at the wet end (Whither? item) 3, 212

Fertilizer
Fertilizer pellets for forest seedling (Whither? item) 8, 572

Fibers
Apparatus for the digestion of wood fibers for the production of pulp 10, 693; Changes in fiber-to-fiber bond during the pulping operation 10, 708; Determination of percentage of birch fibers in mixed pulps 12, 842; Fiber alignment in various papers 10, 710; Fiber length indices for mixed pulps, D. S. Davis 5, 301; Fiber stock refining apparatus 1, 55; Measuring contact angles of fibrous raw materials 5, 323; Process of fiber separation 6, 398; Radio-actively labelled pulp fibers 8, 554; Relation between structure, dielectric constant and electrical resistance of fibers 1, 56; Structure of paper and its properties 5, 324

Fibre Box Association
Sees higher demand for shipping containers 8, 535

Finishing
Finishing machine inspects, sheets, sorts and piles paper in one continuous operation 11, 741

Fluffing
Fluffing (or dusting) of paper 7, 477

Foreign Abstracts
1, 56; 2, 122; 3, 192; 4, 251; 5, 323; 6, 397; 7, 477; 8, 553; 9, 629; 10, 708; 11, 775; 12, 842

Forestry
Air-photo techniques insure more efficient and economical logging road location (Whither? item) 2, 142; Desiccant dusts that dry insects to death (Whither? item) 8, 572; Fertilizer pellets for forest seedlings (Whither? item) 8, 572; Forest fire research lab built in Macon, Ga., by the U. S. Forest Service 6, 375; Forest genetics, Bruce J. Zobel 11, 733; Forest industries council appoints committee to study forest insect and disease control 6, 376; Forestry operations aided by radio, Robert W. Olin 7, 444; Genetics shows the way to improved pulpwood production (an editorial) 7, 419; New Brady tree girdler (Whither? item) 10, 712; New Brunswick forests facing depletion 7, 463; Olin Mathieson Chemical Corp. opens product development at its forest products operations 1, 756; Progress in forest genetics, Bruce J. Zobel 11, 733; Saskatchewan's forest resources can support four pulp mills (Whither? item) 6, 414; Shortleaf pine freed from hardwood competition by aerial spraying with herbicides (Whither? item) 6, 414; South Carolina to begin reforestration program 12, 831; Tree seedlings by hydroponics (Whither? item) 10, 712; USDA in search of fungi that help growth of trees (Whither? item) 4, 272

G

Georgia-Pacific Paper Co.
Develops plastic-coated kraft paper for a weather-proof packaging material (Whither? item) 4, 272; Toledo mill in full operation 3, 156

Glatfelter Co., P. H.
Awarded Regional Safety Award 11, 766

Glue
Breaking of glue in the manufacture of gummed paper 1, 54

Goodyear Tire & Rubber Co. Inc.
Develops Videne, a new polyester laminating film (Whither? item) 4, 272

Great Northern Paper Co.
Great Northern's chemigroundwood process, Carl H. Reed 3, 168

Gulf States Paper Corp.
New Gulf States' pulp mill uses continuous process A. W. J. Dyck 1, 16

H

Halifax Paper Co. Inc.
Announcing the manufacture of Clupak 11, 754

Hamilton Paper Co.
Major expansion completed at Hamilton Paper's Miquon mill 12, 804

Hardwood
Hardwood logging, Charles E. Hein 5, 294; Hardwood utilization by the chemigroundwood process, Carl H. Reed 3, 168; Possibilities in papermaking by the use of hardwoods 5, 324; United States Forest Products Laboratory in Madison, Wis., is recognized for work in hardwoods 4, 241

Hartford City Paper Co.
Two-year renovation ends at Hartford City 9, 611

Heat
New heating process improves wet and drainage (Whither? item) 3, 212

I

Insects
$12,000,000 beats the New Brunswick budworm 9, 682; Effective insect repellent developed by USDA (Whither? item) 6, 414; Fighting the budworm in the Gaspe Peninsula 5, 307; Forest Industries Council appoints committee to study forest insect and disease control 6, 376; Insect loss in stored pulpwood, licked by Nekoosa-Edwards Paper Co. 2, 107

Instrumentation
Automatic control in sulfite process 4, 251

Insulation
Foamsil—a new pure silica insulating and refractory material 6, 364; Glass-reinforced asbestos paper gives electrical insulation (Whither? item) 5, 342; Monel netting cuts insulation maintenance costs 2, 91; Silica

insulating and refractory material (Foamsil) 6, 364
Institute of Paper Chemistry
To build Lou Calder plant biochemistry laboratory 11, 756
International Paper Co.
Announces the manufacture of Clupak 11, 754
International Nickel Co. Inc.
New Process in nickel refining at Port Colborne, Ont., permits recovery of elemental sulfur and selenium (Whither? item) 1, 72

J

Johns-Manville Corp.
Develops glass-reinforced asbestos paper (Whither? item) 5, 342

K

Koppers Co. Inc.
New styrene butadiene latex for paper coatings (Whither? item) 3, 212

L

Lignin
Adsorption of lignin and hemicellulose on cellulose 10, 710; Chemical utilization of lignins, Irwin A. Pearl 1, 30; Lignin recovery from black liquors 7, 480; Nitrogen-containing lignins that are useful as fertilizers 12, 846; Separation of methanol lignin 6, 397
Liquor
Application of pipe, fittings, valves and pumps in black liquor evaporation, Roland L. Allen Jr. 9, 598; Biological effects of various fractions of kraft mill effluents 4, 252; Clarification of liquors from kraft pulping operations 11, 775; Controlling the concentration of liquors from evaporators 8, 548; Dimethyl sulfide made from pulp mill spent liquor 6, 394; Heat and chemical recovery from black liquor 8, 550; Lignin recovery from black liquors 7, 480; Oxidation of sodium sulfide in black liquors 5, 324; Manufacture of acid-cooling liquor for use in sulfite digesters to obtain pulp 12, 847; Microbiological utilization of spent sulfite liquor 2, 122; Pulping with ammonia-base liquor (Whither? item) 4, 272; Recovery of spent liquors in pulping 11, 772; Separation of lignosulfonic acids obtained from sulfite liquor 10, 693; Spent sulfite liquor—a source of food for free swimming oyster larvae (Whither? item) 11, 792; Spent sulfite liquor as a road binder 12, 831; Sugars in technical side relief liquors 11, 776; Treatment of waste sulfite liquors 2, 125; Treatment of waste sulfite liquors 5, 318
Logging
Air-photo techniques insure more efficient and economical logging road location (Whither? item) 2, 142; Log- and chip-handling at Abitibi's Alpena mill, Robert E. Place 6, 362; Logging of hardwoods, Charles E. Hein 5, 294; Trends in logging operations (Whither? item) 2, 142

M

Machinery
A third press on a pulp machine at KVP Co.'s Espanola mill (Whither? item) 11, 792; Apparatus for applying dry steam to a pulp mat to evaporate water 9, 625; Apparatus for coating paper 12, 848; Apparatus for drying webs of pulp 7, 480; Apparatus for removing test pieces from a traveling web of paper 11, 772; Apparatus for the digestion of wood fibers for the production of pulp 10, 693; Apparatus for testing the structure of a moving sheet of paper 10, 692; Couch roll structure for papermaking machines 12, 847; Developments and applications of suction former, D. W. Curtis 6, 358; Digestion apparatus 6, 393; Drying of paper on felt-covered cylinders 11, 775; Dust and odor control equipment installed at Fibreboard Paper Products Corp. 6, 376; Experiences with modern Swedish barkers 2, 122; Factors involved at the open draws at couch and presses 11, 775; Finishing machine inspects, sheets, sorts and piles paper in one continuous operation 11, 741; Flow-eveners for wood chip digesters 6, 392; Dryer felt arrangement 5, 319; Installation of bark burning equipment results in savings (Whither? item) 11, 792; Method of conveying wet pulp webs before entering a dryer 10, 771; Method of improving flow of stock from the stock inlet of a paper machine 8, 548; Movable table and suction box structure for fourdrinier machine 8, 548; New method of sawing produces larger chips 12, 832; Pressurized-furnace steam generator developed by Babcock & Wilcox Co. (Whither? item) 12, 866; Refiner apparatus for removing wax, tar, asphalt and plastic from paper pulp 3, 194; Reverse roll coating machine 10, 693; Stock inlet system for a papermaking machine 12, 846; Suction roll for papermaking machines 4, 255; World's largest newsprint machine at Coosa River Newsprint Co. 3, 185; Vacuum pick-up mechanism in a papermaking machine 11, 772
Maintenance
Fourdrinier wir, how to prolong life of (an editorial) 11, 719; Maintenance should be upgraded (Whither? item) 2, 142
Management
Maintenance should be upgraded (Whither? item) 2, 142
Marathon Southern Corp.
Completes most modern sulfate pulp, paper and board mill, A. W. J. Dyck 10, 662
Mead Pulp Sales Inc.
Develops polyester fiberglass machine hood (Whither? item) 12, 866
Materials Handling
Conveyor system for pulp dryers 4, 254; Newsprint broke handling 1, 56; Pulp bales handled with new method 8, 553; Trends in logging operation (Whither? item) 2, 142; Wood yard crane helps better wood handling 5, 311
Moisture Control
Hurletron moisture control 2, 92
Monastral Reds
A new family of red pigment 5, 295

N

Nekoosa-Edwards Paper Co.
Licks problem of insect loss in stored pulpwood 2, 107; Pioneers in chlorine dioxide bleaching and saran-lined piping 12, 807
New Developments
Chemical research aids new and improved product development (an editorial) 3, 147; Clupak paper (Whither? item) 2, 142; Desiccant dusts that dry insects to death (Whither? item) 8, 572; Fertilizer pellets for forest seedlings (Whither? item) 8, 572; Flash drying of pulp (Whither? item) 7, 500; Machine hood made of polyester fiberglass (Whither? item) 12, 866; New Brady tree girdler (Whither? item) 10, 712; New process in nickel refining permits recovery of elemental sulfur and selenium (Whither? item) 1, 72; New products and new raw materials for the paper industry, Wilmer E. Hansen 3, 163; Oxidized starches for the paper industry, Daniel E. Lucas and Claude H. Fletcher 12, 810; Pelleted pulp opens new horizons (Whither? item) 3, 212; Plastic-coated Kraft paper as a weatherproof packaging material (Whither? item) 4, 272; Quality boxboard from bagasse (Whither? item) 3, 212; Spent sulfite liquor—a source of food for free swimming oyster larvae (Whither? item) 11, 792; Starches, oxidized for the paper industry, Daniel E. Lucas and Claude H. Fletcher 12, 810; Vibroflotation method used for effective soil compaction on sandy industrial sites (Whither? item), 1, 72; Westvaco's flake board (Whither? item) 9, 646; Will the Magnefite process cause a return-swing to sulfite pulping? (an editorial) 10, 651; X-Crepe paper (all-directional stretch paper-base materials) 11, 737
Newsprint
Bowater's Newfoundland Pulp & Paper Mills Ltd. experiments with newsprint 12, 831; Handling newsprint broke 1, 56; Newsprint from southern hardwoods developed by Herty Foundation 9, 612; Newsprint takes a breather, yet capacity continues to grow 10, 683; Supercalendering newsprint 11, 754

O

Odor
Control of odor in the preparation of wood pulp 9, 625; Deodorization in a kraft mill in Milan 8, 553; Elimination of odors in kraft pulp mill operation 9, 625
Olin Mathieson Chemical Corp.
Enters folding carton and corrugated fields 2, 111; Opens new research center for product development at its forest products operations 11, 756
Owens-Illinois Glass Co.
Breaks all-time safety record 11, 766

P

Packaging
New Plastic-coated kraft paper packaging material is weatherproof (Whither? item) 4, 272; Packaging industry sales exceed $10 billion (Whither? item) 5, 342; Packaging material 8, 550; Videne, a new polyester laminating film (Whither? item) 4, 272
Paper and Paperboard
Chemically-modified cotton linters in rag-content paper (Whither? item) 9, 646; Efficient use of starch in sizing paper 7, 481; Fiber alignment in various papers 10, 710; Fiberboard provides protection against radioactive fall-out (Whither? item) 4, 272; Fillers used in paper and board 8, 554; Firms announcing the manufacture of Clupak 11, 754; Fluffing (or dusting) of paper 7, 477; Glass-reinforced asbestos paper (Whither? item) 5, 342; Kraft paper permits low-cost inert gas welding in field applications (Whither? item) 5, 342; Manufacture of chipboards 3, 195; Manufacture of composite molded board 8, 549; Manufacture of gummed paper 1, 54; Method of making fire-resistant fiberboard 11, 772; Method of making flame-resistant paper 10, 693; Method of producing absorbent paper 9, 626; Mullen bursting strength determination on corrugated board 12, 844; Paper from pulp oxidized with periodic acid 7, 477; Papyrus, bamboo and tropical woods in papermaking 6, 398; Possibilities in papermaking by the use of hardwoods 5, 324; Preparation of mineral-filled papers 8, 551; Printability of photogravure papers 10, 708; Production of laminated plastic-impregnated paper tubes 8, 548; Quality boxboard from bagasse (Whither? item) 3, 212; Roll-coating and trailing-blade-coated paper in one operation (Whither? item) 9, 646; Skin drying effects caused by hot air drying of paper and paperboard 5, 323; Structure of paper and its properties 5, 324; Tensile strength of paper 4, 253; Wallboard product 7, 481; Westvaco's flakeboard (Whither? item) 9, 646; Wet strength paper 1, 55
Paper Outlook
1959 production of paper and board (Whither? item) 10, 712; A need for more intensive research (an editorial) 12, 797; Are you ready for the 60's?, J. Kassiday 10, 676; Paper barometer predicts continued improvement in business activity (an editorial) 9, 577; Paper outlook for the next decade, A. Kenneth Beggs 2, 89; Plan new, large-scale expansions now, (an editorial) 2, 77; Planning for the sixties, Morris C. Dobrow 9, 590; Newsprint takes a breather, yet capacity continues to grow 10, 683; Status and development prospects of the paper industry in China 11, 775
Paper Products
Determination of asbestos in paper products 11, 775; Manufacture of composite molded board 8, 549; Method of making fire-resistant fiberboard 11, 772; Method of making flame-resistant paper 10, 693; Method of producing absorbent paper 9, 626; Molded pulp plant

Building PRESTIGE

through service to the reader

Giving SERVICE

to the advertiser through prestige

The PAPER INDUSTRY magazine has established the prestige it holds among its readers through such services as • clear and concise but comprehensive treatment of technical and editorial material in the articles • interpretive reporting • planned balance of reading material directed to management, engineering and technical personnel. And prestige is the quality that attracts discriminating advertisers to this publication.

Who are the readers of The PAPER INDUSTRY?

The PAPER INDUSTRY has the largest circulation to individuals who make and influence buying decisions in every pulp and paper mill in the United States. Of its total controlled circulation of 7483, 90% of the readers are verified by direct communication with the publisher.

What do the readers say?

Chief Engineer: "A top publication with precise clear facts and full of good ideas." **General Manager:** "I like the method of presentation very much. Your at-a-glance pictorial review is excellent." **Technical Supervisor:** "You are giving your readers a real service with your new mill description—especially those readers involved with redesigning, remodeling or rebuilding present or new mill facilities." **President:** "The article on the use of pipe, fittings, valves and pumps is a splendid treatment and shows excellent preparation." **Chemist:** "I like the manner in which you edit the New Products, Foreign Abstracts and New Literature. I believe these cannot be improved upon." **Engineer:** "I like your system of writing up mills. The equipment supplier tabulation helps me by giving easy reference for future use."

These reader comments are proof of the prestige associations enjoyed by advertisers in The PAPER INDUSTRY. These are but a few of the many such comments received; a complete listing is in the hands of our sales representatives. Why not avail yourself of the opportunity to inspect this material? Find out how it can help you to sell pulp and paper mills their vast material and equipment requirements.

The PAPER INDUSTRY

Fritz Publications, Inc.

431 South Dearborn St., Chicago 5, Ill.

PAPER AND PULP MILL CATALOGUE

container 4, 254; Packaging material 8, 550; Porous paper products 3, 195; Production of laminated plastic-impregnated paper tubes 8, 548; Wallboard product 7, 481

Patent Reviews
1, 54; 2, 125; 3, 194; 4, 254; 5, 318; 6, 392; 7, 480; 8, 548; 9, 625; 10, 692; 11, 770; 12, 846

Photography
Air-photo techniques insure more efficient and economical logging road location (Whither? item) 2, 142

Pigments
A new family of red pigments (Monastral Reds) 5, 295

Pipe and Fittings
Discussion of available materials—pipes and fittings, Roland L. Allen Jr. 1, 24; Discussion of available materials—pipe and fittings, Roland L. Allen Jr. 2, 86; Discussion of available materials—pipe and fittings, Roland L. Allen Jr. 3, 161; Pipe, fittings, valves and pumps in chemical recovery and cooking liquor preparation, Roland L. Allen Jr. 9, 598; Pipe, fittings, valves and pumps in mill service, Roland L. Allen Jr. 6, 360; Pipe, fittings, valves and pumps in power and steam generation, Roland L. Allen Jr. 8, 524; Pipe, fittings, pumps and valves in water supply and treatment and waste disposal, Roland L. Allen Jr. 7, 445; Saran-lined piping at Nekoosa-Edwards 12, 807; The role of Pipe, fittings, valves and pumps in the pulp and paper industry (an editorial) 1, 5

Powell River Co. Ltd.
Builds Western Canada's first fine paper mill 9, 616; Wins Centennial Safety Award 10, 696

Printing
Plastic printing plates developed by E. I. du Pont de Nemours & Co., Inc. (Whither? item) 10, 712; Printability of photogravure papers 10, 708

Production
1959 production of paper and board (Whither? item) 10, 712; Genetics shows the way to pulpwood production (an editorial) 7, 419; New heating process improves wet end drainage (Whither? item) 3, 212; New method of sawing produces larger chips 12, 832; Savings resulting from the installation of bark burning equipment (Whither? item) 11, 792; Status and development prospects of the paper industry in China 11, 775; Why cost control? (an editorial) 4, 217

Pulps and Pulping
Apparatus for dewatering pulp or stock 5, 320; Apparatus for drying webs of pulp 7, 480; Automatic control in sulfite process 4, 251; Bauerite pulping process, LeROY Bauer 2, 94; Bleaching groundwood pulp 8, 549; Bleaching of wood pulp with chlorine dioxide 5, 320; Birchwood and birch pulp extractives 2, 122; Brightness in high-density maintained in wood pulp 3, 195; Changes in fiber-to-fiber bond during the pulping operation 10, 708; Chemical recovery in wood pulp preparation 6, 392; Chip moisture in kraft pulping (Whither? item) 7, 500; Clarification of liquors from kraft pulping operations 11, 775; Cold soda pulping system, new continuous 11, 739; Compression wood of Pinus radiata as papermaking raw material 6, 397; Continuous batch refining 5, 324; Continuous cold soda pulping system 11, 739; Continuous pulp mill completed by Eastern Corp., R. M. Ludwig 5, 286; Continuous pulping process at Gulf States, A. W. J. Dyck 1, 16; Control for wood chip chemical digester system, Wesley A. Roth 6, 366; Control of odor in the preparation of wood pulp 9, 625; Cross-linked dicarboxyl starch as a new derivative (Whither ? item) 7, 500; Differentiation between bleached sulfite and kraft pulps 4, 253; Degradation of rayon pulps on storage 8, 553; Delignification of wood and semi-chemical pulps with nitric acid 11, 776; Determining suitability of pulps for acetylation 4, 251; Effects of micro-organisms on groundwood 3, 192; Elimination of odors in kraft pulp mill operation 9, 625; Ether extracts of birch sulfite pulps 5, 323; Fiber length indices for mixed pulps, D. S. Davis 5, 301; Flash drying of pulp (Whither? item) 7, 500; Flow-eveners for woodchips digesters 6, 392; Hardwood utilization by the chemigroundwood process, Carl H. Reed 3, 168; Hydrotropic pulping 12, 844; Infection of groundwood pulp 1, 56; Kraft pulping process for bagasse 12, 848; Kraft pulps from mixed hardwoods of Brazil 7, 477; Magnefite pulping process has many advantages, Dave Coslett 10, 671; Manufacture of acid—cooling liquor for use in sulfite digesters to obtain pulp 12, 847; Micro-mercury determinations in groundwood pulps 6, 398; Method of processing raw wood 9, 625; Modified mechano-chemical pulping 9, 626; NSSC pulp from mixtures of birch and spruce 12, 842; Paper from pulp oxidized with periodic acid 7, 477; Paper stock consistency regulation 2, 124; Pelleted pulp opens new horizons (Whither? item) 3, 212; Permanganate number of pulps 2, 122; Peroxide bleaching (Whither? item) 7, 500; Pigment for use in paper manufacture 5, 318; Pitch deposits formed in bleaching sulfite pulps 4, 251; Preservative treatment and storage of mechanical pulps 3, 192; Production of pith-free paper pulp from bagasse 10, 694; Pulp bales handled with new method 8, 553; Pulp bleaching problems 12, 842; Pulping by the Bauerite process, LeROY Bauer 2, 94; Pulping with ammonia-base liquor (Whither-item) 4, 272; Radio-actively labelled pulp fibers 8, 554; Recovery of spent liquors in pulping 11, 772; Removal of high-density paper stock or pulp from storage tanks 3, 194; Removing wax, tar, asphalt and plastic from paper pulp with refiner apparatus 3, 194; Resin reduction in bleached pulp (Whither? item) 7, 500; Screens used in dewatering NSSC pulp (Whither? item) 9, 646; Semichemical pulp process 11, 770; Specific external surface of fines in groundwood 3, 192; Starch, titanium dioxide and dyes in papermaking 3, 192; Sulfite pulp (Magnefite process), Dave Coslett 10, 671; Trend to continuous digestion in the manufacture of high-quality pulps (an editorial) 5, 277; Will the Magnefite process cause a return-swing to sulfite pulping? (an editorial) 10, 651; Yields of spruce and beech sulfite pulps computed by D. P. measurements 4, 252

Pulpwood
Genetics shows the way to improved pulpwood production (an editorial) 7, 419

Pumps
Available types and materials, Roland L. Allen Jr. 5, 292; Pumps, valves, pipe and fittings in chemical recovery and cooking liquor preparation, Roland L. Allen Jr. 9, 598; Pumps, valves, pipe and fittings in mill service, Roland L. Allen Jr. 6, 360; Pumps, valves, pipe and fittings in power and steam generation, Roland L. Allen Jr. 8, 524; The role of pumps, pipe, fittings and valves in the pulp and paper industry (an editorial) 1, 5; Pumps, valves, pipe and fittings in water supply and treatment and waste disposal, Roland L. Allen Jr. 7, 445

Pusey & Jones Corp.
Tests new pressurized fourdrinier (Whither? item) 6, 414

R

Radio
Radio an essential tool of forestry, Robert W. Olin 7, 44

Rayon
Degradation of rayon pulps on storage 8, 553

Rayonier Inc.
Builds $4,000,000 woodmill at Grays Harbor Div., Hoquiam, Wash. 2, 108; Develops weatherproof adhesive from tree bark (Whither? item) 5, 342; Vibroflotation method used for effective soil compaction on sandy industrial site at Jesup, Ga. (Whither? item) 1, 72

Reactors
Glassed-steel reactors for chlorine dioxide plants (Whither? item) 9, 646

Reigel Paper Corp.
Reigel's new bleached board paper machine (the Carolina Belle), A. W. J. Dyck 7, 436

Research
A need for more intensive research (an editorial) 12, 797; American Society of Mechanical Engineers to study air pollution 12, 832; Buckeye Cellulose Corp. sponsors research at Swedish school 8, 535; Cellulose degradation by ultraviolet light 7, 451; Chemical research aids new and improved product development (an editorial) 3, 147; Continental Can Co. opens research laboratory 7, 463; Fiber Products Research Center Inc.—a newly formed organization in Beaver Falls, N. Y. 8, 537; Forest fire research lab built in Macon, Ga. by the U. S. Forest Service 6, 375; Institute of Paper Chemistry to build Lou Calder plant biochemistry laboratory 11, 756; John W. Bolton & Sons Inc. establishes Pulp & Paper Research Center in Lawrence, Mass. 3, 181; Magnefite pulping process, Dave Coslett 10, 671; Meteor dust—the cause of rain? (Whither? item) 12, 866; Molecular biology to be studied at Syracuse 6, 379; Newly-formed Lower Michigan Pulpwood Research Association (LMPRA) to study forest management 11, 754; Olin Mathieson Chemical Corp. opens product development at its forest products operations 1, 756; Poplar for groundwood and chemi-groundwood W. Brecht 7, 449; Sulfite Pulp Manufacturers' Research League moves to new quarters on campus of Institute of Paper Chemistry 3, 177; Superior newsprint from southern hardwoods developed by Herty Foundation 9, 612; Union Bag-Camp Paper Corp. opens New Jersey research laboratory 5, 307; United States Forest Products Laboratory in Madison, Wis., is recognized for work in hardwoods 4, 241; USDA in search of fungi that help growth of trees (Whither? item) 4, 272; Weatherproof adhesive from tree bark (Whither? item) 5, 342; X-Crepe paper (all-directional stretch paper-base materials) 11, 737

Resin
Resin reduction in bleached pulp (Whither? item) 7, 500

S

Safety
46th National Safety Congress 8, 525; Buckeye Cellulose Corp. sets highest pulp and paper safety record 11, 766; Fritz Memorial Trophy awarded to Falls Paper & Power Co. 8, 512; Owens-Illinois Glass Co. breaks all-time safety record 11, 766; P. H. Glatfelter Co. awarded Regional Safety Award 11, 766; Powell River Co. Ltd. wins Centennial Safety Award 10, 696; Pulp & Paper Section of the National Safety Council adopts "Safest Industry" symbol 3, 182; Studies on mercury as a health hazard in groundwood and paper mills 10, 710

Sandy Hill Iron & Brass Works
Completes 100 years of progress 3, 186

Screens
Screens used in dewatering NSSC pulp (Whither? Item) 9, 646

Series, Article
Adhesives in the paper industry: Part I—Economics and technical achievements of adhesives 8, 515; Part II—The theory of adhesion 9, 593; Part III—Classification of adhesives 10, 673; Part IV—Animal-based adhesives 11, 730; Part IV—Casein and animal blood adhesives (cont.) 12, 808

Series, Article
The use of pipe, fittings, valves and pumps in the pulp and paper industry, Roland L. Allen Jr.: Part I—Discussion of available materials—pipes and fittings 1, 24; Part I—Discussion of available materials—pipes and fittings (Cont.) 2, 86; Part I—Discussion of available materials—pipes (Cont.) 3, 161; Part II—Discussion of valves—available types and materials 4, 232; Part III—Discussion of pumps—available types and materials 5, 292; Part IV—The application of pipe, fittings, valves and pumps in general mill services 6, 360; Part V—Application of pipe, fittings, valves and pumps in water and treatment and waste disposal 7, 445; Part VI—Application of pipe, fittings, valves and pumps in power and steam generation 8, 524; Part VII—Application of pipe, fittings, valves and pumps in black liquor evaporation, chemical recovery and cooking liquor preparation 9, 598

Slime Control
Toxicity of slime controlling agents used in the pulp industry 4, 251

Soil
Soil mechanics—a tool in plant site selection, B. S. Persons 2, 97; USDA in search of fungi that help growth of trees (Whither? item) 4,

272; Vibroflotation method used for effective soil compaction on sandy industrial sites (Whither? item) 1, 72
Sonoco Products Co.
Continuous digester at Sonoco Products, A. W. J. Dyck 9, 584; New corrugating board facilities, A. W. J. Dyck 9, 584
Starch
Cross-linked dicarboxyl starch as a new derivative (Whither? item) 7, 500; Efficient use of starch in sizing paper 7, 481; Oxidized starches for the paper industry, Daniel E. Lucas and Claude H. Fletcher 12, 810; Starch, titanium dioxide and dyes in papermaking 3, 192
Straw
Process for continuous digesting of wood straw, etc. 7, 482
Suction former
Developments and application of suction former, D. W. Curtis 6, 358
Sugar
Sugars in technical side relief liquors 11, 776
Sulfite Pulp Manufacturers' Research League
Moves to new quarters on campus of Institute of Paper Chemistry 3, 177
Sulfur
Recovery of elemental sulfur and selenium permitted by new process in nickel refining (Whither? item) 1, 72
Synthetic Fibers
Synthetic fibers for new paper products, Wilmer E. Hansen 3, 163

T

Technical Association of the Pulp and Paper Industry
44th annual meeting 12, 814
Trends
A glamor status for adhesives (an editorial) 8, 505; Air-photo techniques insure more efficient and economical logging road location (Whither? item) 2, 142; Continuous digestion in the manufacture of high quality pulps (an editorial) 5, 277; In logging operations (Whither? item) 2, 142; Is the pulpwood industry going to chips? (Whither? item) 1, 72; Pelleted pulp opens new horizons (Whither? item) 3, 212; Plastic-coated, all-paper food service for hospital (Whither? item) 2, 142

U

United States Forest Products Laboratory
Is recognized for work in hardwoods 4, 241
Union Bag-Camp Paper Corp.
Opens New Jersey research laboratory 5, 307

V

Valves
Available types and materials, Roland L. Allen Jr. 4, 232; The role of valves, pipe, fittings and pumps in the pulp and paper industry (an editorial) 1, 5; Valves, pumps, pipe and fittings in chemical recovery and cooking liquor preparation, Roland L. Allen Jr. 9, 598; Valves, pumps, pipe and fittings in mill service, Roland L. Allen Jr. 6, 360; Valves, pumps, pipe and fittings in power and steam generation, Roland L. Allen Jr. 8, 524; Valves, pumps, pipe and fittings in water supply and treatment and waste disposal, Roland L. Allen Jr. 7, 445

W

Waste Recovery, Treatment and Utilization
Boiler scale removal with ethylenediamine tetra-acetic acid (EDTA) 5, 324; Biological effects of various fractions of kraft mill effluents 4, 252; Chemical recovery from smelt solutions 10, 692; Dimethyl sulfide made from pulp mill spent liquor 6, 394; Dimethyl sulfoxide from kraft pulping 5, 323; Microbiological utilization of spent sulfite liquor 2, 122; New process for mill waste destruction 12, 831; Oxidation of sodium sulfide in black liquors 5, 324; Recovery of spent liquors in pulping 11, 772; Refiner apparatus for removing wax, tar, asphalt and plastic from paper pulp 3, 194; Report progress in use of spent liquor 12, 831; Spent sulfite liquor as a road binder 12, 831; Treatment of waste sulfite liquors 2, 125; Treatment of waste sulfite liquor 5, 318
Web
Use of electrical energy in heating the web and felt has improved drainage at the wet end (Whither? item) 3, 212
Welding
Ultrasonic welding (Whither? item) 10, 712; Use of kraft paper permits low-cost inert gas welding in field applications (Whither? item) 5, 342
West Virginia Pulp & Paper Co.
Announcing the manufacture of Clupak 11, 754; Manufactures Clupak paper (Whither? item) 2, 142; Manufacture flakeboard (Whither? item) 9, 646
Whither?
1, 72; 2, 142; 3, 212; 4, 215; 5, 342; 6, 414; 7, 500; 8, 572; 9, 646; 10, 712; 11, 792; 12, 866
Wood
Chestnut tree utilization in Italy 12, 845; Compression wood of Pinus radiata as papermaking raw material 6, 397; Digestion of wood by the sulfite method 12, 847; Determination of percentage of birch fibers in mixed pulps 12, 842; Distribution of components in the cell walls of wood 3, 192; Fiber separation process 6, 398; Insect loss in stored pulpwood licked by Nekoosa-Edwards Paper Co. 2, 107; Kraft pulps from mixed hardwoods of Brazil 7, 477; Method of processing raw wood 9, 625; NSSC pulp from mixtures of birch and spruce 12, 842; Papyrus, bamboo and tropical woods in papermaking 6, 398; Poplar for groundwood and chemigroundwood, W. Brecht, 7, 449; Process for continuous digesting of wood straw, etc. 7, 482; Sorption of water vapor by wood constituents 10, 710 Wood handling improved by new wood yard crane 5, 311
